

5.2. LISTING

In the next phase of preparatory operations listing of houses (buildings) in towns and big villages, was carried out using one copy of schematic layouts and lists of settlements and therein other residences were drawn up in rural communities. Based on it the given territory division should be done for Population Census conduction organizational areas: census, supervisory and enumeration areas.

In March-April 2015 were realized instructions on listing and reception order of houses (buildings) in NKR towns and big villages and of rural residences for heads of the NSS NKR regional areas and therein Population Census operations coordinators.

In July -August, 2015 by schedule fixed terms of 2015 Population Census preparation, conduction and data processing operations, were carried out works on drawing up lists of houses by employees (registrars 73 in number) recruited for a period of a month on contract and appropriately trained, including 2 in Askeran, 4 in Hadrut, 7 in Mardakert, 5 in Martuni, 1 in Karvachar , 6 in Shushi, 2 in Berdzor, 1 in Kovsakan, 1 in Midjnavan, 1 in Vorotan and 43 in the city of Stepanakert. Listing operations were realized from July to August. Schematic layouts of residences were one more time adjusted by registrars while drawing up the lists.

Lists of 252 rural communities were drawn up by staff secretaries of rural communities heads and lists of settlements and therein households (except big villages) Form N 2 rural- table 2 were completed in rural communities by staff secretaries of 252 communities heads following records of household registration "Community books" kept in household accounting.

Lists were also included temporary dwelling organizations: rest houses, maternity hospitals, health resorts, hospitals, etc. as well as social organizations: boarding adjacent to schools and boarding schools, social service establishments for aged and disabled, children care organizations.

Till July 1, 2015 urban community housing divisions, rural municipalities, state institutions and legal entities having housing fund under their subordination represented state statistical observation questionnaires "On multi-flat house apartments (dwelling) characteristic" for NKR all multi-flat houses, irrespective of their ownership and belonging. The aim of collecting this data was to ensure exact, common and complete fill in of information on multi-flat houses in the section of "Housing Conditions of Households" of NKR 2015 Population Census Questionnaire.
